

SUPPLEMENTAL CPS INVESTIGATIVE REPORT

On Monday, March 23, 2026, at approximately 11:00 p.m., CPS proceeded to the San Carlos Apache Health Care Emergency Room to further assess the reported incident involving an infant presenting with suspected non-accidental injuries.

Upon arrival, I observed an air ambulance medical team actively preparing the infant victim for emergency air transport to Phoenix Children's Hospital (PCH) for a higher level of care.

I made contact with head nurse S. Elms, who advised that radiology findings confirmed trauma to both the right and left rib cage, noting the injuries were internal in nature. Nurse Elms further stated that the radiology report had been transmitted to the attending physician, Dr. Kotter.

I conducted photographic documentation of the infant victim, including images of the head, facial area, and both sides of the rib cage, for evidentiary purposes.

While on scene, Sergeant W. Nosie from the San Carlos Police Department arrived at the emergency room. I briefed Sergeant Nosie regarding the circumstances. He advised that he would notify Tribal Detectives to initiate a parallel criminal investigation.

I subsequently spoke directly with the attending physician, Dr. Kotter, who agreed to provide a statement. Dr. Kotter reported that the infant's parents brought the child to the emergency room due to shortness of breath. Upon evaluation, the radiologist informed Dr. Kotter that the rib cage injuries were consistent with non-accidental trauma.

Based on the severity of the injuries and the assessed substantial risk of harm, Dr. Kotter made the decision to have the parents leave the emergency room to ensure the infant's safety and prevent further potential risk.

During intake, Ms. Gina Stevens identified the infant's mother as Kellieann Goseyun, possibly from the China Town area. Ms. Stevens further reported that a white adult male accompanied Ms. Goseyun and may be the child's father; however, no identifying information was obtained for the male at that time.

On Tuesday, March 24, 2026, at approximately 3:54 a.m., CPS was contacted by social worker Kayla Merritt at Phoenix Children's Hospital (PCH). Ms. Merritt advised that the infant had been admitted and would undergo a full skeletal survey, including imaging of the head and entire body, to assess for additional injuries.

Ms. Merritt further advised that Edward Hernandez, trauma social worker, would serve as the primary point of contact at PCH and provided contact information as (602) 909-4278.

This matter remains under active investigation. Follow-up will include identification and assessment of all caregivers, coordination with law enforcement, and ongoing medical evaluation of the infant.

A copy of this report will be provided to law enforcement to support the joint investigation.

CPS Investigator:

Alex Lewis
